

Assistant Financial Engineer

As a member of the Expertise Department, your duties will include, but may not be limited to, the following tasks:

- Daily monitoring of Koris quantitative solutions
- Developing the department's automation
- Creating and/or improving marketing material for Koris investment strategies
- Assisting the development/implementation of new Koris investment strategies
- Producing ETF analysis to support the research effort of TrackInsight
- Assisting current client operations regarding ETF selection, due diligence and ratings

This internship will provide you with the opportunity to evolve in a dynamic environment and take on an active role in multiple projects from their creation to their implementation.

This internship may lead to a fixed-term or open-ended contract offer.

Profile

Academic background (with a specialization in finance):

Business school, engineering school or university (minimum 5 years' higher education).

Applicants should display a strong interest in the financial industry and portfolio management. They must be rigorous and demonstrate an interest in applied problems. They should develop an ability to explain complex subjects in simple terms such as the investment processes developed by Koris International.

Skills required for the internship

- 1) An advanced level of proficiency in at least one of the following fields:
 - Statistics and probability
 - Finance and asset management
 - Financial econometrics
- 2) Excellent command of Excel, Word and PowerPoint
- 3) Excellent command of French and English (spoken and written)

Soft skills:

- Team spirit
- Autonomous
- Rigorous
- Results oriented
- Eagerness to learn
- Initiative
